INVESTMENT STORY

The problem

The business turns stock faster than it can fund it, and its growth is capped by working capital rather than by demand.

Our solution

Projects RH built the model and the teaser from the trading history, so a buyer sees the cycle and the margin rather than a projection.

Our advantage

Supplier and customer relationships are long standing, and the stock is graded and bonded.

The market

Demand is regional and steady, and the business already sells into it.

Why it works

The capital buys stock, and the stock has a buyer before it is bought.
